

Position Expectation

UI/UX Designer

MINT is currently seeking an experienced UI/UX Designer to join our growing team. We are offering a varied, challenging job where you can bring your own ideas and develop them further in a highly motivated and international environment. We offer attractive incentives and fair remuneration in modern offices in the beautiful city by the water, Kiel.

Location: Kiel, Germany

Compensation: Market competitive and commensurate with the experience of the successful candidate

Targeted start date: ASAP

UI/UX Designer Duties and Responsibilities

- As UX/UI designer you are a member of our product development team and responsible for the user experience of our (web-based / mobile) product
- Starting from user needs through ideas and strategic concepts to the final design you are a driver in product development
- You are committed to collaborative teamwork with product owners, developers and other stakeholders
- You contribute to our design system and care for a consistent UI across our platform in close collaboration with other designers and frontend developers
- In collaboration with your team and support of our UX researchers you conduct and analyze user research

UI/UX Designer Job Knowledge, Skills and Abilities

- Must be able to communicate effectively in English both verbally and in writing
- Must be able to pass a background check
- Hold an unrestricted travel passport (required)
- Experience with enterprise software (preferred)
- Willing to ask question and challenge established opinions in order to get the right outcome
- Possess strong interpersonal communication and relationship-building skills
- Must have expert knowledge of UI design principles, grid systems, and responsive design
- Must have deep knowledge of design and prototyping tools
- Must have the ability to manage your time effectively and prioritize task and work with minimal supervision

UI/UX Designer Education and Experience

- Bachelor's degree in communications design, HCI, information design or equivalent work experience (preferred)
- Proven track record as a digital product designer or UX/UI designer with strong UX and UI skills, preferably working on sophisticated web or mobile-based products, at a fast-paced and execution-focused environment
